StepFree Commerce

Accessibility audit report

Harbor & Pine (fictional demo store) · https://harbor-pine.example · platform: static demo page · standard: WCAG 2.2 AA · test date: 2026-11-12

Scope and method

Templates tested (desktop):

- product — https://harbor-pine.example/products/stoneware-mug

Automated tools: axe-core, Playwright keyboard pass. Manual checks: . Automated tests find only part of the barriers; the manual checks cover keyboard use and screen-reader output.

Findings

2 critical · 3 serious · 0 moderate · 0 minor

Cart button has no accessible name

critical · WCAG 4.1.2 (level A) · Theme code · templates: product

The cart icon button has no text, so screen readers announce only "button" and users cannot find the cart.

How to fix: Add aria-label="Cart, N items" to the button in the header section.

No visible keyboard focus on buttons

critical · WCAG 2.4.7 (level AA) · Theme code · templates: product

outline:none removes the focus indicator, so keyboard users cannot see where they are — including on Add to cart.

How to fix: Remove outline:none and add a :focus-visible outline of at least 2px with 3:1 contrast.

Product image has no text alternative

serious · WCAG 1.1.1 (level A) · Content · templates: product

The product photo has no alt attribute; screen readers read the file name.

How to fix: Use the image alt field in the product admin; fall back to the product title in the theme.

Newsletter field has no label

serious · WCAG 1.3.1, 4.1.2 (level A) · Theme code · templates: product

The email field has no label, so screen readers announce only "edit text".

How to fix: Add a visible <label for="newsletter">.

Sale badge text contrast 2.0:1

serious · WCAG 1.4.3 (level AA) · Theme code · templates: product

Pink text on light pink is hard to read; WCAG requires 4.5:1 for small text.

How to fix: Use white on #8b1e1e (9.1:1) in the badge styles.

Before and after

Cart button has no accessible name

Before

After

Sale badge text contrast 2.0:1
